

LOCAL 1-2 UPDATE

ENTERGY

For immediate release- January 18, 2010

At 2:15 Federal Mediator Peter Donatello asked the parties to honor a two day cooling off period and to reconvene Wednesday morning, January 20, with a new deadline of midnight Wednesday January 20th. This Union feels that the sides are still far apart and that Entergy is doing everything in its power to provoke a strike or labor dispute. Because of the importance of the nuclear facility, this Union is doing everything in its power to reach agreement. We are hoping that Entergy will start bargaining in good faith and consider the needs both of their workers and of the community we serve.
